

3 IMPORTANT STEPS TO FOLLOW FOR COMPLETE SUCCESS

1. KEEP QUICK SHOT FRESH, MIX ONLY ENOUGH FOR EACH SHIFT. IT ONLY TAKES 2 MINUTES TO MIX. IF YOU HAVE SOME LEFTOVER, GO AHEAD AND USE IT IN THE NEXT MILKING SHIFT BUT DON'T MIX ANYMORE UNTIL IT IS ALL USED.
2. MIX QUICK SHOT ACCURATELY AND KEEP MIXING EQUIPMENT CLEAN
3. MAKE SURE THE COW'S TEATS ARE 100% COVERED BOTH PRE AND POST DIPPING. WE CANNOT IMPROVE THE SKIN IF IT DOESN'T RECEIVE COVERAGE.

SIDE NOTE:

A DAIRYFARMER FROM MISSOURI CALLED AND ORDERED A SET OF QUICK SHOT TEAT DIP. HE MENTIONED THAT HE HAD WEATHER CRACKS ON HIS THUMB THAT HURT AS MUCH AS A BROKEN ARM. AFTER JUST 3 DAYS OF USING QUICK SHOT ON HIS COWS TEATS AND HIS THUMB, HE CALLED BACK THRILLED TO DEATH TO REPORT THAT THE SKIN ON HIS COWS TEATS WERE MUCH IMPROVED AND THAT HIS THUMB WAS NEARLY HEALED!

QUICK SHOT IS REVOLUTIONIZING TEAT SKIN CARE

QUICK SHOT 10X NOW HAS **4 LEVELS OF CONDITIONING**. YOU SIMPLY USE 1 OF THE 2 RECIPES PROVIDED AND INCREASE OR DECREASE THE AMOUNT OF PART B TO ACHIEVE PRIME SKIN CONDITIONING FOR THE MOST ECONOMICAL PRICE ON THE MARKET.

FOR EXAMPLE:

IF YOU PURCHASE QUICK SHOT 10X TEAT DIP AND YOUR TEAT SKIN IS CHAPPED OR ROUGH AND THE TEAT ENDS HAVE HYPERKERATOSIS, SIMPLY MIX QUICK SHOT 10X AT THE HIGHEST CONDITIONING LEVEL (**LEVEL 4**) AND WATCH HOW QUICKLY THE SKIN CONDITION IMPROVES. THIS NORMALLY TAKES 3-7 DAYS. WHEN THE TEATS ARE MUCH IMPROVED SIMPLY CHANGE RECIPES OF QUICK SHOT 10X TO A LOWER LEVEL (**LEVEL 1 or 2**) FOR CONTINUED GREAT RESULTS. IF BAD WEATHER IS PREDICTED SIMPLY GO BACK TO A HIGHER LEVEL AND GET AHEAD OF CHALLENGES THAT MAY BE COMING.
